

Mathematics with `nantex`

Inline math

Einstein's mass-energy equivalence: $E = mc^2$. The quadratic formula gives $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$.

Display math

Euler's identity:

$$e^{i\pi} + 1 = 0$$

Maxwell's equations in free space:

$$\nabla \cdot \mathbf{E} = 0 \tag{1}$$

$$\nabla \cdot \mathbf{B} = 0 \tag{2}$$

$$\nabla \times \mathbf{E} = -\frac{\partial \mathbf{B}}{\partial t} \tag{3}$$

$$\nabla \times \mathbf{B} = \mu_0 \varepsilon_0 \frac{\partial \mathbf{E}}{\partial t} \tag{4}$$

Matrix

$$A = \begin{pmatrix} a & b \\ c & d \end{pmatrix}, \quad \det(A) = ad - bc$$
